Date: Saturday, 17th January 2026

This letter serves as a **formal proposal** outlining a structured approach to the development, ownership participation, and revenue-sharing arrangement for **BOSSTIPZ LMS**, pending agreement and subsequent execution of a Memorandum of Understanding (MOU).

1. Background & Rationale for This Proposal

Following our discussions, it is clear that the **technical development, infrastructure, security, hosting, and long-term maintenance** of **BOSSTIPZ LMS** require significant financial and operational commitment.

As earlier assessed, the estimated cost of building, deploying, and sustaining the platform runs into several millions of naira annually. Given that you have indicated that **you are not financially committing to the development at this stage**, and your contribution is primarily through **marketing influence and access to your students as initial beta users**, it becomes necessary to structure a **revenue-sharing model** rather than an upfront development fee.

Please note clearly:

- This proposal exists **only because no direct financial investment is being made**.
- If financial investment were available, **no revenue-sharing structure of this nature would be required**. We would instead be discussing **equity allocation between administrative and technical shareholders**.
- Your role and influence are **highly germane** to the success of this project. BOSSTIPZ LMS remains **your idea**, and your institutional access gives the product its first real traction.

2. Technical Partnership & Third-Party Infrastructure Support

In view of the scale, cost implications, and long-term technical requirements of the BOSSTIPZ LMS project, I have, **through my company**, engaged a technology firm based in Lagos to provide backend and infrastructure support.

All consultations, contractual obligations, revenue allocations, and operational engagements with this firm shall be **channeled exclusively through**:

Oluwafemi Sunmola Technologies Ltd
(RC: 8815307)

The supporting technical firm operates under the name:

Mofhage Tech Solutions Ltd
(RC: 9215280)

Mofhage Tech Solutions Ltd will provide infrastructure and technical support to BOSSTIPZ LMS **as a subcontracted technical partner under my company**, covering areas including but not limited to:

- Platform infrastructure engineering
- Hosting and cloud services
- Security, data protection, and compliance
- System reliability, performance optimization, and scalability

Proposed Revenue Share (Handled via Oluwafemi Sunmola Technologies Ltd)

The agreed revenue-sharing structure for technical infrastructure and long-term system support is proposed as follows:

- **50% revenue share for 10 active revenue years**, or
- **80% revenue share for 5 active revenue years**

For clarity, **active revenue years** are defined strictly as years during which BOSSTIPZ LMS is actively generating revenue. Any idle, paused, suspended, or non-revenue-generating periods **shall not be counted** toward the agreed duration.

All revenue distributions to Mofhage Tech Solutions Ltd shall be **administered and settled through Oluwafemi Sunmola Technologies Ltd**, which remains the primary technical and contractual counterpart to the BOSSTIPZ LMS project.

3. My Development & Technical Stake

In consideration of:

- Waiving all development fees,
- Acting as a **life technical partner**,
- Bearing technical risk and execution responsibility,

I will retain a **permanent developer and technical partner stake**, structured as follows:

- **I will receive 50% of whatever residual revenue share remains after the agreed third-party technical share.**
- **This 50% developer stake is perpetual, meaning it continues even after the expiration of the third-party revenue-sharing agreement.**
- **My dividends will be received through:**
  - **Mofhage Tech Solutions Ltd** (as the technical conduit), and
  - Subsequently remitted to **Oluwafemi Sunmola Technologies Ltd (RC: 8815307)**.

4. Revenue Scope & Jurisdiction Clarification

To avoid future ambiguity, revenue sharing applies as follows:

- Revenue sharing is **limited strictly to students, courses, or institutions you directly teach in or formally influence**.
- Any revenue generated **outside your academic jurisdiction** will **not be shared**, unless you decide to:
  - Contribute financially to the project, or
  - Take on broader institutional or strategic responsibilities.

If you are willing to bear **even minimal financial cost** beyond student influence, then revenue from **all sources** (both within and outside your jurisdiction) can be reconsidered for sharing.

+234-805-548-8895

Importantly:

- You are **not financially committed** under this proposal.
- Your contribution remains **influence-based**, not monetary.

5. Lecturer Payments Before Revenue Sharing
All revenue sharing discussed above shall occur **only after**:

- Lecturers and content contributors have been paid their **agreed percentage** per enrolled student, course, or topic.

This means:

- You earn **first as a lecturer**, based on your courses.
- You then earn **again as a shareholder/partner**, based on the agreed revenue-sharing structure.

6. Ownership & Future Scaling
While you retain conceptual ownership and early influence over BOSSTIPZ LMS, it is important to note that:

- As marketing scale increases,
- As technical expertise deepens,
- And as external institutions come onboard,

Your revenue participation remains tied to your **jurisdiction**, unless you opt to **invest financially** in the product.

7. Next Steps
Once you indicate:

- Which revenue-sharing duration works best for you, or
- Any areas of disagreement or adjustment,

We can resolve outstanding points and proceed to **draft a formal MOU** ahead of product launch.

Thank you once again for the opportunity to collaborate on BOSSTIPZ LMS. I believe this structure protects all parties fairly, reflects actual contributions, and positions the platform for sustainable growth.

I look forward to your feedback.

Warm regards,

Oluwafemi Sunmola
